

Dear FCC,
Please reject the NAB's petition 04-160 which limits satellite radios ability to broadcast localized content.

I am a subscriber of XM satellite radio because it provides me the variety and choice of music and talk radio that I can't get anywhere else.

How does it benifit me or anyone else to not be able to hear local content over satellite radio? Surely this decision would not be in the best interest of the millions of consumers of such services.

Let the free market decide what kind of content we want to listen to in our cars and homes. If we want to pay for such services why should we not have the right to do so?

Please let Satellite radio to compete fairly with locally broadcast radio by rejecting 04-160.

This is an exciting time for radio please do not stomp out the innovation before it ever gets a chance to reach its potential.

Thank you,
Scott Rohde
